The Evolution® Chrome Collection

We all have to compromise on lots of things as time goes by. Yet style should not be one of them.

Our Evolution® Collection defines the philosophy employed by Easa, in which **all the family** can use well designed and stylish products, while benefiting from maximum functionality and safety.

Our Doors are subject to extensive testing to meet the requirements of **EU Construction Products Regulation (EU) No 305/2011 (CPR)** in durability, impact resistance and cleanability.

The Evolution® Collection Doors have plastics with **accredited antibacterial** properties that reduce the risk of harmful bacteria and cross infection, including MRSA. The White Evolution Collection doors have this protection in the white coating as well.

Evolution® Chrome doors are available with a choice of either clear (toughened/security glass) panels or frost (polycarbonate) panels.

If a standard door configuration or size is not suitable we also offer made to measure doors. Please contact us to discuss your requirements.

EU Construction Products Regulation (EU) No 305/2011 (CPR)
BS EN 14428 : 2015 Shower Enclosures/Doors
